

Charity Tools

The **Charity Tools** addon is a collection of tools that may be useful for charity-based sites. It currently is comprised of two tools: the **Good Neighbor Badge** and the **Charitable Badge**. More tools may be added if/as the needs arise.

<tip c n>This page of the manual describes features that are currently in development/beta. The Charity Tools addon will be available for public use beginning with GeoCore 7.2.0</tip>

Good Neighbor Badge

The **Good Neighbor Badge** is an award that can be given by the site admin to specific users. The idea is to provide an easy way to identify users who have a history of supporting various charities. Once awarded, the badge will appear alongside all of the user's listings for a duration that may be specified in the admin (default: 12 months). Administrators can award this badge on the *Users / User Groups > List Users > User Data Display* page by clicking the "Activate" button on the "Good Neighbor Status" row.

Charitable Badge

The **Charitable Badge** provides a way for users purchasing listings to add a set donation earmarked to a specific charity. You can think of it almost as a "tip jar" where the seller can select a recipient. The cost of the badge will be added to his order, and a badge image you set will be shown next to that listing, to signify that the seller has made a donation. Each charity can also be assigned to a Region, and then will only appear as a selectable option for sellers of listings in that region. An admin page allows you to run a report of all Charitable Badge purchases across a given timeframe and shows the totals for each, so you can then apportion the funds as needed.
