2025/10/27 08:20 1/2 Pedigree Tree

Pedigree Tree

This addon allows you to collect the pedigree tree information **during listing placement/listing edit**, and display that information on the listing details page. The information is **search-able**, and the data is saved in *new fields* in its own table in the database, so that you are free to use your optional site-wide fields for other purposes. This is ideal for equine related sites, or other sites that would make use of a pedigree tree. It will collect and display as many *generations* as you wish, similar to the screen shot below.

It will also add a section to the advanced search page, to allow searching by sire or dam, as you can see below. Note that it searches through every sire and dam in a listing's pedigree tree, not just the immediate 1st generation.

In the addon's settings, you can specify the maximum number of pedigree tree generations. It also allows you to specify a certain number of those generations to be required. This allows a great deal of customization, as you can specify to collect, for example, 5 generations, but only require the first 2 generations, making the rest optional.

By placing the addon's pedigree tree tag in your classifieds or auctions details templates, it will

Last update: 2015/11/16 19:36

display the pedigree tree information wherever you place the tag in your template. The information will display similar to the screen shot below.

<tip c n>Note: To display the pedigree tree information on the listing details page, as it does in the
screen shot above, you need to add a tag to your template. You would add the tag {addon
author='geo_addons' addon='pedigree_tree' tag='listing_tree'}¹¹) to the default auction
(/main_page/listing_auction.tpl) and classified (/main_page/listing_classified.tpl) details
templates./tip>

Or the tag {addon author='geo_addons' addon='pedigree_tree' tag='listing_tree'} if using file-based design.
