# Edit Text [S]

This page allows you to edit text that might be used by a specific addon, on a per language basis.

A few things to note about editing addon text:

- There will be a different section for every language you have defined on your site.
- Once you change a particular text field, you can change it back to the default text by clicking on the *Reset to Default* link.
- Once you have made the changes needed, at the bottom of the page click the **Save Text Changes** button.
