

# Settings

## Storefront General/Manager Settings

### Search Engine Friendly URLs

This feature is currently not fully working, keep this setting set to **no** for now.

### List Stores Page: max logo width

### List Stores Page: max logo height

Set the maximum dimensions of storefront logos as they appear in the "list stores" page.

## Setting up the StoreFront

### Step 1: StoreFront Subscription Choices

First, set up your Storefront Subscription Choices in the admin on the page [Addons > Storefront Addon > Subscription Choices](#). See the linked page for more info.

### Step 2: Fields to Display

Next, specify which browsing columns (fields) will be displayed within the sellers' StoreFronts on your site, on the page [Addons > Storefront Addon > Fields to Use](#). See the linked page for more info.

### Step 3: Display StoreFront Link

Now choose which categories (if any) of your main site will have an additional "StoreFront" column displayed. You can make this selection in the admin on the page [Addons > Storefront Addon > Display Storefront Link](#). See the linked page for more info.

### Step 4: StoreFront Template(s)

The StoreFront Addon comes with a default template that will be added when you install the addon. However, you can create and offer as many additional StoreFront Templates as you want to offer your sellers. They will choose which one they want to use while they are setting up their StoreFront:

Storefront Templates		
Name	Description	
Custom StoreFront Template 1	Template with Red Background color.	<a href="#">edit</a> <a href="#">view</a> <a href="#">delete</a>
Custom StoreFront Template 2	Template with Blue Background color.	<a href="#">edit</a> <a href="#">view</a> <a href="#">delete</a>
Custom StoreFront Template 3	Template with Green Background color.	<a href="#">edit</a> <a href="#">view</a> <a href="#">delete</a>
Storefront Default Template	Mimmicks the original default template for classauction software.	<a href="#">edit</a> <a href="#">view</a> <a href="#">delete</a>

## Step 5: StoreFront Privileges

The last step in preparing the StoreFront Addon to be offered on your site is to access each main Price Plan that you want to give StoreFront privileges to. When editing the Price Plan, edit the [cost specifics](#) for the price plan, and at the bottom of the page will be the [Plan Items](#) section.

Click **configure** next to the Storefront Subscription plan item, and choose whether to allow the storefront for that price plan, and if it is allowed, which of the subscription choices are available to use with that price plan.

That's all there is to it. You should now go ahead and register as a user on your site and practice using the StoreFront as a seller to understand exactly how it works. Please review the [client\\_side\\_editing](#) section of this manual for instructions on how sellers will use the StoreFront Manager to configure their StoreFronts.
