

Zip/Postal Code Search

Admin Menu Category: **Addons > Zip/Postal Code Search**

After installing this addon, you must [import](#) the zipcode data you wish to use. Once that is complete, the only "automatically appearing" functionality is the zip filter criteria within the advanced search form. If you want to have zip search filtering ability within your category browsing, you will need to place the zip search filter module within the design where you want that to appear. Go to the [Zipsearch Module](#) explanation page for more about this filtering functionality.
