

Featured Level 2-5 Modules

Featured Listing Modules Pic Display 1 & 2 for Levels 2 - 5

Featured Listing Pic Modules give you the ability to display rows and columns of individual Listing Pictures while browsing the site, instead of the traditional table (or list) format. Typically, the first picture that the seller uploads will be the picture that is displayed in this section. Each module has its own settings so that you can designate the maximum number of Featured Listings to display, the number of columns and rows, the title, price, etc.

You will notice that there are various levels associated with these modules as well. The same rule applies to these modules as it does with the Featured Listing Modules. All listings whose sellers have paid for Level 2-5 Featured Listing status will display wherever the Featured Pic Module 1 modules are used. The same principle applies for all levels.

Featured Listing Modules 1 & 2 for Levels 2 - 5

A "Featured Listing Module" allows you to display the listings associated with that module in a table (or list) format, similar to the standard Features Listing table. You have a variety of options in which you can display this list. These options include the number of listings to display in the table, which columns to display, thumbnail sizes, etc. Featured Listings Modules display all featured listings from the currently browsed category.
