

Text Search

The software offers a tool which allows you to perform a text search to help you quickly locate and edit the text you are searching for.

Simply click on the Text Search link in the Pages Management Menu or the Templates Menu in the Administration Menu and you will be given a form which allows you to perform a search for exact word matches throughout the content of your site. The results page will return three sets of results if applicable. It will return text results for Page Text, Templates, and HTML Logged In/Out Modules.
