

User Account Settings

This page contains settings useful for customizing the My Account section of your site. For now, the switches deal almost exclusively with the My Account Home Page.

Main Settings

My Account Home Type

You can select to use either the newer "My Account Page" layout or the older "User Management Home Page" layout. Examples of each are shown below (click on them to see bigger pictures). If choosing the "My Account Home" setting after upgrading from a version of the software prior to 4.0.0RC11, you'll want to make sure you include the **(!MY_ACCOUNT_LINKS!)** module (shown on the left in the first screenshot below) in the template used on the My Account Home page, so that your users can navigate their account settings. If you installed the software at version 4.0.0RC11 or higher, this is now the default setup, and already done for you.

User Management Home Page (Old)

The screenshot shows the 'My Account...' page with a blue header bar containing links: 'Browse', 'Search', 'Sell', 'My Account', 'Privacy', and 'Contact Us'. On the right of the header are '01/07/2009', 'Sign Out', and 'Welcome testing1'. Below the header is a section titled 'Account Settings for testing1' with a sub-section 'Access various areas of your account by clicking on the links below'. This section contains a grid of icons and links:

	new listing		my account information
	my active listings		my messages
	my expired listings		message settings
	my favorites		print signs and flyers
	my listing filters		invited list of buyers
	my current bids		block listed buyers
	feedback management		my storefront

Below this is a section titled 'My Current Account Balance: \$350.92US' with two buttons: 'account balance history' and 'add to account balance'.

Post-Login Landing Page

You can choose which page the user is directed to after they login here...to the user management home page or the site wide home page. Upon successful completion of login the user will be directed to the page you choose.

Number of rows per table

Here, you can choose the maximum number of rows you would like to appear in information tables on the My Account Page (this setting has no effect if you are using the old User Account Home Page)

Boxes

The My Account Home Page organizes information into what we call, simply, "boxes." Each box shows information related to a different aspect of the software. The checkboxes in this section can be used to turn each box on or off. If a box is turned off, it will not display on the front-side of the site until it is turned on again (though any relevant data, such as which Auctions have recently sold, will still be tracked).

The "Recently Sold" row has a sub-setting that can be used to specify how far back in time (in days) the Recently Sold box looks when finding listings that have been sold. In other words, this setting lets you specify exactly how recent is meant by "Recently."
