How Our Auction & Classified Software Works

The intent of this section is to help you, as the administrator, to have a clearer understanding of our auction and classified software operates, and how it can help you to create a World-Class Auction or Classified website. There are several topics in this section that we have specifically chosen to cover due to their complexity. A clear understanding to how each of these works and interrelates with the other is a necessity for you to set up your site in a minimal amount of time. If you do not read anything else in this manual, please read the entire How Our Auction & Classified Software Works section. You will save yourself valuable time in the long run. The main topics we will cover in this section are:

Design

- How pages, templates and Modules work together
- How User Groups and Auction / Classified Price Plans Work Together
- How to Manage Unlimited Extra Question Fields and Standard Fields for your Classifieds and Auctions

Misc

- Orders / Order Items
- Auction and Classified Listing Cart
