

Downloading Software

As a customer of Geodesic Solutions, you will have access to your own personal **client area** on our site that allows you to access and download your software and available updates any time, day or night. Once your order is placed, you will receive an email with instructions on how to access the "client area" (different from the Support Center login).

Once you access your client area you will see a screen similar to the image displayed below. Click on the **View** button for the particular order that you want to download.

The screenshot displays two tables within a client area interface. The top table, 'Recent Order Activity', has columns for Order, Cart, Ordered, Created, and Options. The bottom table, 'Recent Invoice Activity', has columns for Order, Invoice, Total, Balance, Created, and Options. In the 'Recent Order Activity' table, the 'View' button in the 'Options' column for order #1001 is highlighted with a yellow box.

On this screen, click the **Download** button for the package you wish to download. Note that the *Fresh*

Install package downloads will be near the top of the page, and the *Update* packages will be near the bottom.

<tip n c>**NOTE:** As we make new releases of the software available in the "client area", you may see additional downloads for your edition. These may have an **RC1** or similar postfix added to the end of the version number. RC stands for Release Candidate, which means that the download is being proposed for release. So, although the RC release is available to you, it is still undergoing some internal testing. Typically, if we post an RC to the [client area](#) it is safe to download. For example, you may see *Version 4.5.0RC1* available for download.</tip>

Access Denied Error

When you click the **Download** button as described in the instructions above, are you getting an error message similar to the one displayed below?

This means that your *Support & Software Updates/Downloads* package has expired. You receive a full year of *Support & Software Updates/Downloads* included in every new product license purchased. After the year is up you can extend the service for another year by clicking on **[Renew]** link on that same page under the **Update Packages Purchased**. See screen shot below.
